Weekly Coal Production

Production for Week Ended:
March 12, 1988

Summary

U.S. coal production in the week ended March 12, 1988, as estimated by the Energy Information Administration, totaled 18.1 million short tons (bituminous coal and lignite, 18.0 million short tons; Pennsylvania anthracite, .08 million short tons). This was 3.9 percent lower than production in the previous week, and was 4.7 percent higher than production in the corresponding week of 1987. Production in Montana, North Dakota, and Wyoming was impaired this week due to a blizzard in the northern Great Plains.

Cumulative data in Table 1 are presented for the 52-week period ended in the current week. Data for the 52-week period ended in the corresponding week one year earlier are also included.

The methodology used to make weekly estimates of coal production was published in the Weekly Coal Production (DOE/EIA-0218(86/35)), released for publication on September 8, 1986.

Figure 1. Coal Production

Table 1. Coal Production

Production and Carloadings	Week Ended			52 Weeks Ended		
	03/12/88	03/05/88	03/14/87	03/12/88	03/14/87	Percent Change
Production (Thousand Short Tons)						
Bituminous ¹ and Lignite	17,985	18,718	17,187	918,562	877,673	4.7
Pennsylvania Anthracite	76	80	70	4,271	4,223	1.1
U.S. Total	18,062	18,798	17,257	922,833	881,896	4.6
Railroad Cars Loaded	113,068	117,731	104,067	5,899,907	5,620,591	

¹Includes subbituminous coal.

Notes: 1987 and 1988 data are preliminary. Total may not equal sum of components because of independent rounding.
